SUBJECT Proposed Revisions to FCID 1/14

In response to tasking concerning Subject, the following is offered.

" The proposed new paragraph 21 reads:

"21. Security Violations. Individuals determined to have disclosed or caused disclosure of classified information to any person not authorized to receive such information may be considered ineligible for initial SCI access approval or for continued SCI access. In instances when cause is found to terminate SCI access because of unauthorized disclosure, termination and debriefing shall be accomplished without delay. Terminations shall be recorded in the Community-wide, Computer-assisted, Compartmentation Control System."

" The addition to the last section of Annex A reads:

"Individuals responsible for disclosing or causing disclosure of any classified information to a person not authorized to receive such information may be denied initial or continued SCI access."

" The Central Intelligence Agency does not concur with the proposed addition to paragraph 11.g of the draft revision of FCID 1/14. The requirement to determine scholastic aptitude/achievement through review of test results is unrealistic in terms of what educational institutions are willing or able to provide. Further, it is questionable if intellectual honesty can be measured from a comparison of grade point average and tested aptitude. Too many other factors figure in academic achievement.
